

MY FUTURE

Hi! My name is Wanda and I want to talk to you about my experience in the future. First of all, I'm going to talk about my life: I live in the year 2059. We are living in Mars; yes we live in another planet. Why? Now I'm going to explain it to you. We live in these conditions because of us; the planet was so horrible that we needed to leave. It was full of garbage but not the garbage that you are thinking of. I'm talking about phones. Yes, the phones left us without a planet and the fault is ours. We preferred to have more and more technology so we ended like these, in another planet. But don't think that life in Mars is horrible: it is absolutely the opposite, it is great, but it was horrible to see your planet being destroyed in your eyes. Now I hope that we can do the best in this planet, I hope this planet is going to give us a second chance. I'm going to do my best so that we are not going to finish like the Earth did.

Hope you enjoyed my blog.

Goodbye for now.

Wanda.
